

Drum Screen RS

- Simple robust quality machine for pumped flows.
- Separated dirty/clean side eliminates "carry over".
- Can be used as one stage pre treatment before membrane filtration.
- Easy changeable & alternative filter/screen/slot panels.
- Integrated screenings conveyor, wash press & shredder.
- Alternative solutions for drum cleaning reduces water consumption.
- Enclosed, safe & hygienic with easy to open access doors.

Drum Screen RS

Drum Screen RS separates solids from water.
The water is filtered from the inside of the drum.
The drum is inclined and screw flights inside it conveys the separated solids out by the drum rotation.
A brush and flush system cleans the perforations.

Perforation 0,01-10mm
Capacity 10-200l/s

MN has hundreds of international references and has worked with machinery within water treatment for 30 years. We offer the most innovative solutions and the most extensive knowledge on screening equipment. We make all our products ourselves acc to ISO & CE standards, Swedish steel working tradition and quality culture. We only use certified materials and welders.
