

Screw Press SP

- Simple single tube trough construction.
- Robust wear steel lined screw and thick wear bars.
- Compact design with selectable drive unit gives flexibility.
- Enclosed, safe & hygienic.

Screw Press SP

Screw Press SP is used for compaction och conveying of screenings and wet waste.

Screw Press SP forces the material into a pipe system or against a back force device like the Shredder MT which gives heavy mechanical agitation for high compaction and dewatering.

The screw flights gives a pulsating treatment of smaller portions which also increases dewatering, & compaction.

Height 300-700mm
Diameter 150-400mm
Inlet length 500-1000mm
Dryness 30-40%
Capacity 0,5-7m³/h

MN has hundreds of international references and has worked with machinery within water treatment for 30 years. We offer the most innovative solutions and the most extensive knowledge on screening equipment. We make all our products ourselves acc to ISO & CE standards, Swedish steel working tradition and quality culture. We only use certified materials and welders
