# Sludge Receiver EX.

Sludge Receiver EX is a complete system for separation of debris & rubbish from sludge & water. Sludge trucks can connect directly to the tank.

## Advantages

- Robust innovative design from quality stainless materials.
- Selectable screening separation. Preferably self cleaning Cross Screen.
- Selectable screenings treatment. Wash Press, Screw Press, Ram Press.
- Alternative tank configurations. Integrated stone trap conveyor, Truck compressor air evac.
- Enclosed, safe & hygienic with easy to open access doors

## Function

Using a Cross Screen XS keeps the sludge concentrated. No need for flush water with self cleaning Cross Screen.

Sludge Receiver EX can consist of:

- Inlet tank with air evacuation.
- Stone trap with spiral conveyor.
- Cross Screen XS step type fine screen 3-6mm.
- Wash Press TP.
- Shredder MT.

## Specifications

Capacity sludge	1-5 m <sup>3</sup> /min
Capacity water	10-100 l/s
Motored gears	SEW and Nord
Material	EN1.4301, EN1.4404 or by client demand

*MN has hundreds of international references. We are proud of our extensive knowledge and continuous development of the most innovative solutions available on the market of screens and screenings handling equipment within water and waste water treatment.*

*We have been on the market for more than 30 years and many of our well-engineered products has been benchmarks for the entire industry.*

*We design and manufacture all of our products in our own factories in Sweden.*

*We are certified with the latest ISO- and CE- standards. Swedish steel working traditions and the highest quality.*

Towards a cleaner world.
